

DAS-ITE Marketplace Services and Rates: Consolidated Services

Effective July 1, 2008 (beginning of Fiscal Year 2009), a number of changes are taking place that affect DAS-ITE marketplace services and rates. Fifty-eight (58) services are being consolidated into other service IDs to streamline services and make it easier for customers to get what they need by simply ordering one service. Please note that this will not affect the actual service or levels of service received by the end-user; the only noticeable change will be on the billing.

The charts below show how services have been consolidated. The first table shows consolidated services by group. The columns on the left (green columns) describe the 'parent' service, while the columns on the right (blue) show what services were consolidated into the parent service. The second table provides the same information, but lists the services that have been consolidated on the left and what service it has been consolidated in to on the right.

Please note that FY09 rates have been rounded to two decimal places in most cases.
