How to determine your drug cost

It can be a challenge to estimate your prescription drug cost, especially if your drugs are categorized in Tiers 3–5. Consider the questions below to help you determine how much you will pay for covered medicine.

- What is the name of your drug?
- What is the dosage amount you take of your drug?
- How do you take your drug? For example, is your drug in a pill form? Or is it injectable?
- What is the name of your doctor?

Once you know the answers, follow these steps to get an *estimate* of your drugs costs.

1. Access the group formulary on YourMedicareSolutions.com to find out which tier your drug is on.
2. Call Group MedicareBlue Rx Customer Service at 877-838-3827 and refer to the State of Iowa Group 38073.
3. Tell Group MedicareBlue Rx Customer Service to run a trial claim to find out your drug costs. Please note that this is **only an estimate** and the costs may change once you are enrolled.

IMPORTANT TERMS TO KNOW

It is important to understand what these terms mean, and how they impact your benefits.

Coinsurance: This is your share of the cost of a covered medicine, calculated as a percent of the medicine's full cost. For example, if a medicine costs \$100 and your plan requires 20% coinsurance, you would pay \$20 for the medicine.

Coverage gap: Medicare Part D drug plans have several phases of coverage: the initial coverage stage, the coverage gap stage and the catastrophic coverage stage. During the initial coverage stage, you will pay copays or coinsurance for your drugs based on the plan design and tier on which your drug resides. When your *total yearly drug costs* equal \$4,430; you will enter the coverage gap stage. In the coverage gap, you'll pay \$5 for Tier 1 drugs, \$10 for Tier 2 drugs, and no more than 25% of the plan's cost for drugs on Tiers 3, 4 and 5. You will remain in the coverage gap stage until your *total out-of-pocket costs* reach \$7,050.

Catastrophic coverage: After your *total out-of-pocket costs* reach \$7,050, you hit the catastrophic coverage stage where, under the \$5/\$10/20%/45%/33% plan benefits, you'll pay \$3.95 for covered generic drugs and \$9.85 for all other covered drugs; or 5 percent of the cost of covered drugs, whichever is greater.

Specialty drug coverage: Medicare classifies certain unique and high-cost medications as specialty drugs. These include injectable antibiotics, transplant drugs, certain chemotherapy drugs and other self-injectable or administered drugs.

Total yearly drug costs: The amounts that you, the member, **and** your prescription drug plan have paid for covered drugs in that calendar year. This does not include any premiums.

Total out-of-pocket costs: The amounts you, the member, have paid for covered drugs in a calendar year. This does **not** include the amount that your prescription drug plan has paid or premiums. If you should change prescription drug plans in the middle of the year, to another Medicare Part D plan, your total out-of-pocket costs "follow" you, and you will receive credit for amounts already paid under the prior plan.
