Vehicle Allocations—Limited Quantities, Urgent

Due to continuing supply chain issues, some manufacturers will be limiting quantities of certain vehicles available for purchase. The GM vehicles listed will have more than one allocation period this year. The Toyota models and Ram ProMasters below have been allocated for the entire year; there will be no more available after the first offering. Orders need to be placed as soon as possible and ordering will close once the allocation has been met. We will update the contract catalog when the allocated numbers have been met.

Chevrolet Allocations:

- Chevrolet Heavy Duty Trucks - crew cabs, double cabs and regular cabs
- Chevrolet Malibu

Toyota Allocations:

- Toyota Camry Gas and Hybrid
- Toyota Corolla Hybrid

Ram Allocations:

- Ram ProMaster Cargo 1500, 2500, 3500

Renewable Fuel Decal

The House File requires State motor vehicles to be affixed with a highly visible renewable fuel sticker. This is to notify the traveling public that the motor vehicle is powered by the highest possible classification of renewable fuel. DAS Fleet Services is placing these stickers on all new vehicles and is able to offer these decals to State agencies wishing to update their fleet. Please notify Fleet Services the quantity of decals needed to update your fleet.

Vehicle Fun Facts:

We still have four new Ram ProMaster Citys available for immediate delivery! These are the last small cargo vans available in the U.S. and are great for transporting cargo in tight areas like downtown Des Moines. Contact Fleet Services for more information.
