Iowa Department of Administrative Services – Human Resources Enterprise
Classification Series Guidelines

Studio Engineer Series

Classes in the Series

Class Code	Class Title
14754	Studio Engineer
14757	Studio Engineer Senior
14759	Studio Engineer Advanced

Series Concept

These positions will work primarily in diagnosing, repairing, and maintaining facilities and electronic equipment for Iowa Public Television at the network operations center (NOC), with specialization in Audio, Video, Digital, Remote Control, and computer-based engineering as it relates to repair and operation of NOC.

Exclusions

The following are excluded from classification within this series:

1. Positions working primarily at the transmitter/translator sites across the state of Iowa and performing duties in transmitter/translator installations, with specialization in Audio, Video, Digital, Remote Control, and computer-based engineering related to repair and operation of these systems. These positions should be classified in the Transmitter Engineer Series.
2. Positions working primarily in the operation of master control equipment, with specialization in Audio, Video, Digital, Remote Control, and computer-based equipment associated with master control. These positions should be classified in the Master Control Operations Technician Series.
3. Positions working primarily on production equipment for Iowa Public Television at studio facilities and remote locations, with specialization in Audio, Video, or Remote (mobile unit/flight pack) Engineering, Editing, and Acquisition. These positions should be classified in the Production Technician Series.

Class Distinctions

Studio Engineer

Positions at this level perform routine duties operating, diagnosing, repairing, and maintaining facilities and all electronic equipment for Iowa Public Television at the Network Operations Center (NOC), with specialization in Audio, Video, Digital, Remote Control, and computer-based engineering.

Studio Engineer Senior

Positions at this level perform the more complex duties operating, diagnosing, repairing, and maintaining facilities and all electronic equipment for Iowa Public Television at the Network Operations Center (NOC), with specialization in Audio, Video, Digital, Remote Control, and computer-based engineering.

Studio Engineer Advanced

Positions at this level perform/oversee the operation, diagnosis, repair, and maintenance of facilities and all electronic equipment for Iowa Public Television at the Network Operations Center (NOC), with specialization in Audio, Video, Digital, Remote Control and computer-based engineering.
