Iowa Department of Administrative Services – Human Resources Enterprise
Classification Series Guidelines

Transportation Engineer Series

Classes in the Series

Class Code	Class Title
04243	Transportation Engineer
04244	Transportation Engineer Specialist
04245	Senior Transportation Engineer

Series Concept

This series include non-supervisory positions performing licensed professional engineering work in projects and programs related to roadway planning, development, construction, and maintenance in the Department of Transportation.

Exclusions

Positions that perform technical work not requiring a professional engineer license.

Class Distinctions

Transportation Engineer

Employees perform professional engineering work in transportation projects and programs. They may lead a squad or small section of technical engineering staff.

Transportation Engineer Specialist

Employees provide consultative services to all levels of engineers as a technical expert in a recognized engineering discipline. Professional engineering work is performed to coordinate and lead specialized transportation projects and program areas.

Senior Transportation Engineer

Plans, monitors, and coordinates the development of projects, programs, and activities on a regional, division, or department-wide basis. Employees provide professional engineering, administrative, and staff liaison services. They research problem engineering issues and new engineering technology. Employees conduct studies and facilitate policy and project development in diversified engineering areas.
