Diabetic Vision Benefit

Vision care is critical for diabetics. While everyone should get an annual eye exam, diabetics may need to be treated more often because diabetes puts vision at risk.

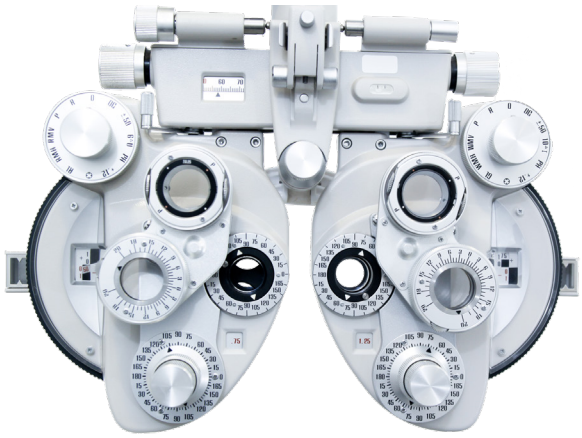

DELTAVISION'S DIABETIC VISION BENEFIT INCLUDES:

- **An office visit and diagnostic testing every 6 months** in addition to the comprehensive eye exam
- Retinal imaging for a digital image of the retina and optic nerve to **help with early diagnosis**
- Extended ophthalmoscopy for **a more detailed examination of the retina**
- Gonioscopy performed during the eye exam to **evaluate the internal drainage system** of the eye
- Scanning laser **for sharper images of the retina** than standard exams provide

VISION CARE & DIABETES

The link between vision care and diabetes is strong:

- **More than 20%** of people with diabetes learned of their diagnosis through an eye exam[1]
- Diabetes is the **#1 cause of blindness in adults**[2]

> "Diabetics are **40% more likely** to have glaucoma, and **60% more likely** to have cataracts."
>
> — American Diabetes Association
