Travel Card Controls

The Travel Card Program adds more accountability and convenience through a variety of control features built in at the card level which provides for management reporting. For instance,

- a. The Program allows the State to control spending limits and/or transaction limits.
- b. The Program allows the State to designate if spending is allowable by utilizing Merchant Category Code (MCC) blocking, which restricts Travel Card use for payment of certain types of vendors.
- c. The Program allows the State to set controls at a department level and/or employee level.

Transaction Limits

Travel Cards may be assigned a transaction limit. A transaction limit or single purchase limit is the amount available on the Travel Card for an individual purchase. A transaction includes the purchase price, including applicable tax. An employee is not to make a purchase greater than the approved amount. The employee's department administration is responsible for approving and processing changes to the Travel Card's transaction limit.

NOTE: A vendor or service that is not restricted does not imply it is an allowable purchase.
