

Learning Management System Unveiled

August 2020

The Department of Administrative Services (DAS) is launching a statewide initiative to enhance the training experience through implementation of Learnsoft, our new Learning Management System (LMS). **This learning management system (LMS) replaces the IITS system and will change the way employees sign up for and track their training.**

Learnsoft recently sent out emails with individual login credentials to get you started. If you have any questions about the email, please contact your [Training Liaison](#). With this new system, employees will access the PDS course catalog for training needs and will experience a simplified course enrollment process. View this helpful [video](#) to learn more.
