Position Type Change		
Filled	220 – Position Type Change	377 – Employee Status/Condition of Employment Change
Vacant	220 – Position Type Change	N/A
Replacement Position (Overlap)	280 – Add Replacement Position	*(4)

Notes: If a dual transaction occurs, such as class code change and a pay grade change to the same position in the same pay period, the user only needs to process one M-5 type 210 Reclassify. Additionally, if a P-1 type 692 is completed for a position with a dual M-5 action occurring, a P-1 type 741 does not need to be completed.

M-5s must be approved by all parties no later than 4:30pm of the last day of the pay period to be effective the first day of that pay period. For example, the first day of a pay period is 8-16-13; therefore, the M-5 must be approved by 4:30pm on 8-29-13 to be effective for 8-16-13.

- *(1) An M-5 is not required on this type of change. This information is contained on the classification detail screen in the HRIS Position Control module. When the administrative user updates the class information on this screen, it will automatically update the position information.
- *(2) Whenever this type of change is done HRIS automatically updates the Employee Information record.
- *(3) Contact DAS-SAE for assistance with pay distribution M-5s.
- *(4) The M-5 creates a position in HRIS that has an identical payroll number to the original position. Once the incumbent vacates the original position, the system automatically moves the replacement employee into the original position and deletes the replacement position.

Note: Personnel Officers approve the M-5s at the HR Level. Pre-Audit only approves P1s at CERT/COMP Levels.
