   - **Change Contributions**: Used to change an existing deferral or to start a new deferral to a specified money source.
     
     **NOTE**: If you currently have deductions from your pay that are not displayed on this screen in the “Current Contribution Rate” field, you will still need to select “Change” to change the amount, or “Stop Contributions” to stop an existing deduction. Your payroll office will have the proper information in their system. If you have made changes to your deductions prior to February 13, 2011, it will not be displayed here. Going forward, your changes will be stored and displayed here.

4. Next, select either Dollar Amounts or Percentages (if applicable) for the type of deduction you want for each money source, either Percent or Dollar if your plan allows both options. If your plan only allows one or the other, their selection will be displayed as not selectable.

5. In the New Contribution Rate field (which will be labeled as the money source being changed, e.g., Roth, Pre-Tax, etc.), enter the amount or percent of the election you wish to have deducted from your pay each pay period.

6. Input the effective date (mm/dd/yyyy), or select to choose the date from the calendar. Changes may not be effective immediately, depending upon when your employer’s payroll department implements the requested change. Please allow for at least one payroll cycle for the change to take effect. **NOTE**: The dates MUST be the same in both the Contribution Elections and Investment Elections portions of the screen.

7. If more than one money source is available, this process will be repeated until you’ve made elections to each option.

8. Select the Investment Provider(s) and, if available, the Contract Number for the allocation changes by clicking (> ) next to the Investment Provider.

---

If your investment provider has sent a data file to planwith**ease.com** with your contract information, it will appear here. If this is a new contract or the investment provider has not yet sent planwith**ease.com** data, you may click on the **Add Contract** button to add a contract. Type in the Contract Number if known. If not, you may leave the word “New” in the box.
9. Enter the whole number percentage to be directed to each Investment Provider in both the New IP Election and New Contract Election field.

| Note | If you are allocating funds to more than one Investment Provider, the allocation percentage must equal 100% across all Investment Providers. In addition, if you have more than one contract within an Investment Provider, the allocation percentage must total 100% under that specified Investment Provider. |

10. Click on the checkbox beside “I authorize the investment election changes to this money source” for each money source, in order to record your elections and move to the next step. A “Reset Investment Elections” button is available to clear election changes made in error.

11. Select the **Next** button.

12. Review the request and select the **Submit**, **Go Back** or **Cancel** button.

| Note | **Cancel** will clear any changes back to the Manage Investments page, **Go Back** will return you to the previous page. |
