

USE OF STATE MASTER AGREEMENTS FOR SCHOOL SECURITY VULNERABILITY MITIGATION

State of Iowa cooperative purchasing allows governmental entities and political subdivisions, including schools, in the state to purchase from master agreements created by the Department of Administrative Services (DAS) - Central Procurement. Cooperative purchasing is a collaborative effort providing benefits in pricing, product quality, and contract process efficiencies for public purchasing entities throughout Iowa.

Commodities and services covered under these agreements include the following:

- Electronic Security and Communications Systems
- Entry Control
- Illumination
- Perimeter Security
- Radios
- Other Security Solutions

Complete details of individual agreements can be found at:

<https://bidopportunities.iowa.gov/Home/AwardedContracts>

Under the search heading, "Product/Service" type the word "vulnerability," and a listing of vendors will appear. Click on the corresponding contract number to access complete contract information including all documents, attachments, and forms.

Direct any questions regarding the use of Master Agreements to purchasing.mailbox@iowa.gov

To utilize these Master Agreements (MA), the agency, school, or local entity must contact the vendors directly via the following contact information:
